

Biodata of the Scientist

Division/Section: Crop Production

A. Personal information

1. Name(With Title): Nedunchezhiyan Maniyam

1. a. Qualification: Ph.D.

2. Designation: Principal Scientist

3. Address (Personal): Plot No. 1341, Paikanagar, Bhubaneswar – 751 019, Odisha, India

4. Phone Numbers:

(a)Residence _____ (b)Intercom _____ (c)Mobile: 098611270511.

5. Email: mnedun@gmail.com

6. Countries visited: China, Lao PDR, Thailand

B. Professional information

1. Area of specialization: Root and Tuber Crops Agronomy

2. Area of interest: Weed, water and nutrient management in tuber crops based cropping systems

3. Number of institute projects completed (Add list): Five

4. Number of Institute projects being handled (Add list): One

5. Number of externally funded projects completed (Add list): One

6. Number of externally funded projects being handled (Add list): One

7. Number of students guided for a) Ph.D: One b) M.Phil _____ c) M.Sc Two

8. Number of students being guided for a) Ph.D _____ b) M.Phil _____ c) M.Sc _____

8.a. information about the students under your guidance

Name of the student	Course undergoing (Ph.D/M.Phil/M.Sc)	Title of the project/Thesis	E-mail address

9. Information on guide ship

Guide ship for Ph.D/ M.Phil/ M.Sc	University	Subject
	Orissa University of Agriculture and Technology	Agronomy
	Calcutta University	Horticulture
	Vishva Bharathi	Agronomy

10. Number of Research papers (Add list): 110

11. Number of Books/Book chapters(Add list): 11/21
12. Number of Technical Bulletins(Add list): 4
13. Consultancies offered (Add list and give a brief description): 4
14. Technologies developed (Add list and give a brief description): 10
15. Patents/Copyrights obtained (Add list and give a brief description): -
16. Any other information:

LIST OF PUBLICATIONS OF DR. M. NEDUNCHEZHIAN

Research papers

1. Nedunchezhiyan, M., Byju, G., Dash, S.N. and Ranasingh, N. 2013. Selected soil enzyme activities, soil microbial biomass carbon and root yield as influenced by organic production systems in sweet potato. *Communications in Soil Science and Plant Analysis* 44(8): 1322-1339.
2. Nedunchezhiyan, M. and Sankaran, M. 2013. Cormels and minicorm sett techniques for seed corm production in *Amorphophallus*. *Aroideana* 36: 136-145.
3. Lenka, A. and Nedunchezhiyan, M. 2013. Biochemical composition of two edible aroids. *E-planet* 10 (2): 39-42.
4. Nedunchezhiyan, M., Byju, G. and Ravi, V. 2012. Photosynthesis, dry matter production and partitioning in cassava (*Manihot esculenta* Crantz) under partial shade of a coconut plantation. *Journal of Root Crops* 38 (2): 2012.
5. Nedunchezhiyan, M., Jata, S.K., Mukherjee, A. and Misra, R.S. 2012. Sprout bud culture: A rapid multiplication technique for elephant foot yam (*Amorphophallus paeoniifolius* [Dennst.] Nicolson) propagation. *Aroideana* 35: 132-143.
6. Nedunchezhiyan, M., Byju, G. and Ray, R.C. 2012. Effect of tillage, irrigation and nutrient levels on growth and yield of sweet potato in rice fallow. *ISRN Agronomy* 2012: 1-13, Article ID 291285, doi: 10.5402/2012/291285.
7. Byju, G., Nedunchezhiyan, M., Ravindran, C.S., Santhosh Mithra, V.S., Ravi, V. and Naskar, S.K. 2012. Modeling the response of cassava to fertilizer: A site specific nutrient management approach for greater tuberous root yield. *Communications in Soil Science and Plant Analysis* 43(8): 1149-1162.
8. Nedunchezhiyan, M., Jata, S.K., Byju, G. and Veena, S.S. 2011. Effect of tuber crops waste/byproducts on nutritional and microbial composition of vermicomposts and duration of the vermicomposting process. *Journal of Botany* 2011: 1-6, Article ID 801703, doi: 10.1155/2011/801703.
9. Nedunchezhiyan, M., Jata, S.K., Mukherjee, A. and Misra, R.S. 2011. Impact of growth regulators on cormel production and dormancy breaking in elephant foot yam (*Amorphophallus paeoniifolius* (Dennst.) Nicolson). *Journal of Root Crops* 37 (1): 24-28.
10. Shankaran, M., Singh, N.P., Jai Prakash, Santhosh, B. and Nedunchezhiyan, M. 2011. Production of seed corms through cormels in elephant foot yam (*Amorphophallus paeoniifolius* (Dennst.) Nicolson). *Journal of Root Crops* 37 (1): 86-87.
11. Ravi, V., Ravindran, C.S., Suja, G., James George, Nedunchezhiyan, M., Buju, G. and Naskar, S.K. 2011. Crop physiology of elephant foot yam [*Amorphophallus paeoniifolius* (Dennst. Nicolson)]. *Advances in Horticultural Science*, 25 (1): 51-63.
12. Nedunchezhiyan, M., Jata, S.K., Ray, R.C. and Misra, R.S. 2011. Management of mealybug (*Rhizoecus Amorphophalli*) in elephant foot yam (*Amorphophallus paeoniifolius*). *Experimental Agriculture* 47 (4): 717-728.

13. Nedunchezhiyan, M. 2011. Evaluation of sweet potato (*Ipomoea batatas*) based strip intercropping systems for yield, competition indices and nutrient uptake. *Indian Journal of Agronomy* 56 (2): 98-103.
14. Nedunchezhiyan, M., Laxminarayana, K., Rajasekhara Rao, K. and Satapathy, B.S. 2011. Sweet potato (*Ipomoea batatas* L.)–based strip intercropping: I. Interspecific interactions and yield advantage. *Acta Agronomica Hungarica*, 59 (2): 137-147.
15. Nedunchezhiyan, M., Byju, G.. and Misra, R.S. 2010. Effect of drp fertigation on yield and economics of elephant foot yam. *Journal of Water Management* 18 (1&2): 60-64.
16. Nedunchezhiyan, M., Byju, G., Naskar, S.K. and Mukherjee, A. 2010. Effect of mulching and graded doses of fertilizer on yield and nutrient uptake of greater yam + maize intercropping system. *Indian Journal of Horticulture*, 67 (special issue):
17. Nedunchezhiyan, M., Byju, G. and Dash, S.N. 2010. Effects of organic production of orange fleshed sweet potato (*Ipomoea batatas* L.) on root yield, quality and soil biological health. *International Research Journal of Plant Science*, 1 (6): 136-143.
18. Nedunchezhiyan, M., Rajasekhara Rao, K., Laxminarayana, K. and Satapathy, B.S. 2010. Effect of strip cropping involving sweet potato (*Ipomoea batatas* L.) on soil moisture conservation, weevil infestation and crop productivity. *Journal of Root Crops*, 36 (1): 53-58.
19. Ravi, V., James George, Ravindran, C.S., Suja, G., Nedunchezhiyan, M., Byju, G. and Naskar, S.K. 2010. Method of leaf area determination in elephant foot yam (*Amorphophallus paeoniifolius* (Dennst.) Nicolson). *Journal of Root Crops*, 36 (1): 78-82.
20. Ravindran, C.S., Ravi, V., Nedunchezhiyan, M., James George and Naskar, S.K. 2010. Weed management in tropical tuber crops: an overview. *Journal of Root Crops*, 36 (2): 119-131.
21. Nedunchezhiyan, M., Anantharaman, M. and Sethuraman Sivakumar, P. 2010. Effectiveness of a winter school on quality planting material production of tropical tuber crops. *Journal of Root Crops*, 36 (1): 95-99.
22. Nedunchezhiyan, M., Rajasekhara Rao, K. and Satapathy, B.S. 2010. Productivity potential, biological efficiency and economics of sweet potato (*Ipomoea batatas*) – based strip intercropping systems in rainfed Alfisols. *Indian Journal of Agricultural Sciences*, 80 (4): 327-330.
23. Nedunchezhiyan, M. 2010. Performance of greater yam (*Dioscorea alata*) + maize (*Zea mays*) intercropping as influenced by mulching and levels of N-P-K fertilization. *Indian Journal of Agronomy*, 55 (1): 1-4.
24. Sethuraman Sivakumar, P., Nedunchezhiyan, M., Paramaguru, S. and Ray, R.C. 2009. Production system-specific differences in farmers demand for greater yam (*Dioscorea alata*) varietal attributes in Orissa state, India. *Experimental Agriculture*. 1-14.
25. Srinivas, T., Nedunchezhiyan, M. and Misra, R.S. 2009. Marketing of elephant foot yam – an upcoming commercial crop in India. *Indian Journal of Agricultural Marketing* (Conference special). 23 (3): 179-188.
26. Naskar, S.K. and Nedunchezhiyan, M. 2009. Evaluation of sweet potato genotypes for fodder yield and proximate composition. *Journal of Root Crops*, 35 (2): 229-231.
27. Archana Mukherjee, Naskar, S.K., Nedunchezhiyan, M. and Rao, K.R. 2009. In vitro propagation of elephant foot yam. *Indian J. Hort.* 66 (4): 530-533.
28. Nedunchezhiyan, M., Byju, G. and Naskar, S.K. 2008. Performance of sweet potato (*Ipomoea batatas*) varieties under shaded and open field conditions. *The Indian Journal of Agricultural Sciences*, 78 (11): 974-977.

Consultancy

Consultancy on scientific methods of root and tuber crops cultivation was provided to the following organizations.

1. **CARE, India**
2. **Orissa Tribal Empowerment and Livelihoods Programme (OTELP),
Bhubaneswar, Orissa**
3. **Orissa Watershed Development Mission (OWDM), Bhubaneswar, Orissa**
4. **PRAVA**

Technologies Developed :

- Maize was identified as a suitable companion crop in greater yam. Greater yam + maize intercropping system recorded 36.7% higher tuber equivalent yield than sole greater yam with gross and net return of Rs. 93625/ha and Rs. 38535/ha, respectively. Inclusion of maize as intercrop in greater yam gave additional net return of Rs. 22055/ha.

- Greater yam + maize intercropping system, application of NPK @ 120:90:120 kg/ha along with mulching (2 t/ha dried farm waste) recorded higher yield and net returns.
- Close growing pulse crops like green gram, black gram and vegetable cow pea were found best intercrops in *Amorphophallus*.
- *Amorphophallus* + green gram intercropping system, application of NPK @ 80:60:80 kg/ha along with mulching (2 t/ha dried farm waste) was found optimum for higher yield and net profit.
- Greater yam sett size 200 g planted at 90 x 90 cm spacing was found optimum as intercrop under established coconut garden. The highest net return of Rs. 37750/ha and benefit cost ratio of 2.06 was realized in such intercropping.
- Sweet potato and red gram strip intercropping (3:3 rows) was found profitable under upland ecosystem. In this system produced higher tuber equivalent yield (13534 kg/ha), net return (Rs. 28075/ha) and benefit : cost ratio (3.24).
- Sweet potato can be successfully established under zero tillage after harvest of rice under low land ecosystem.
- 5-7 irrigation was found optimum for sweet potato in rice – sweet potato cropping system.
- Organic farming technology for the production of orange fleshed sweet potato.
- Cassava varieties Sree Jaya and H-165 were found suitable for intercropping in newly and established coconut garden.
- Sweet potato variety Samrot was found profitable for intercropping in newly and established coconut garden.
- Seed corm production techniques in *Amorphophallus*.
- Micro corm techniques in *Amorphophallus* production.
- Potassium nutrient management for sweet potato.
- Fertilizer boron requirement of sweet potato.
- Management of collar rot and other diseases of *Amorphophallus*.
- Two taro varieties Panisaru-1 and Panisaru-2 are released for cultivation in Orissa under wet land ecosystem.
- One sweet potato variety Kalinga is released for cultivation in Orissa.
- Orissa elite, a greater yam (*Dioscorea alata*) variety is released for cultivation in Orissa.
